

BLASS & ZIEGLER GMBH
STARTERS · ALTERNATORS

Your **strong** partner for “ ” starters & alternators

Blass & Ziegler GmbH

was founded in 1984 by Ulrich Blass and Gerhard Ziegler in Saarbruecken. The focus of our work is the remanufacturing of starters and alternators.

Since the beginning **more than 35 years ago** we have enjoyed **continuous and stable growth**, and today we remanufacture our product range at our modern 4500 m² production facility, located in Saarbruecken.

Based on more than 35 years of experience, we offer high-quality products from a wide range of areas. The range includes **starters and alternators** for commercial vehicles, agricultural and construction equipment, forklift trucks and industrial engines.

Our **customers** include the major manufacturers of construction equipment and forklift trucks as well as numerous European airports and municipal workshops.

Our range of **starters and alternators** is extremely comprehensive and largely covers extensively the needs of the global commercial vehicle fleet and machinery park.

QUALITY *Our quality defines standards*

Quality is our top priority. Our employees are continuously trained to work according to the latest guidelines of the manufacturers. In production, we work with high-tech equipment, such as the latest test benches from the market leader.

COMPETENCE *Experience meets high-tech*

Our core competence is the remanufacturing of original parts in OEM quality. Over the years, we have expanded our product range with numerous new parts. We also manufacture new parts for classic cars or spare parts that are no longer available.

ENVIRONMENTALLY FRIENDLY

Recycling at its very best

We have always made our contribution to the protection of the environment and the responsible use of natural resources through reuse and efficient processes throughout the company. This is also demonstrated by our long-standing membership in the Saar Environmental Pact.

SERVICE Always there for you

We see ourselves not only as a service provider, but as a partner to our customers. Our employees in sales and service are happy to assist you with all your questions and concerns. In our online catalogue, you will find the current availability, product images and technical information around the clock.

OUR HISTORY

1984 In January 1984, the company Blass & Ziegler was founded in Saarbruecken by Ulrich Blass & Gerhard Ziegler.

1990 By 1990, the company already employs a staff of 10 dedicated employees.

1996 Construction of new office space, warehouse and production facilities are completed. Built on fully owned land, with a footprint of 25,000 m², these new premises provide a solid foundation for future growth.

2001 Accession to the Saar Environmental Pact - First certification according to ISO 9001

2004 In the company's twentieth year, we employ 25 members of staff, who, at a production capacity utilisation of 100%, are driving the further success of the company.

2006 With a staff of 35 highly qualified team members, the company supplies over 1,800 customers throughout Europe with starters and alternators in excess of 50,000 units

2010 Company staff reaches 40 members. Construction of 4,500 m² of expansion of production and quality assurance facilities is completed.

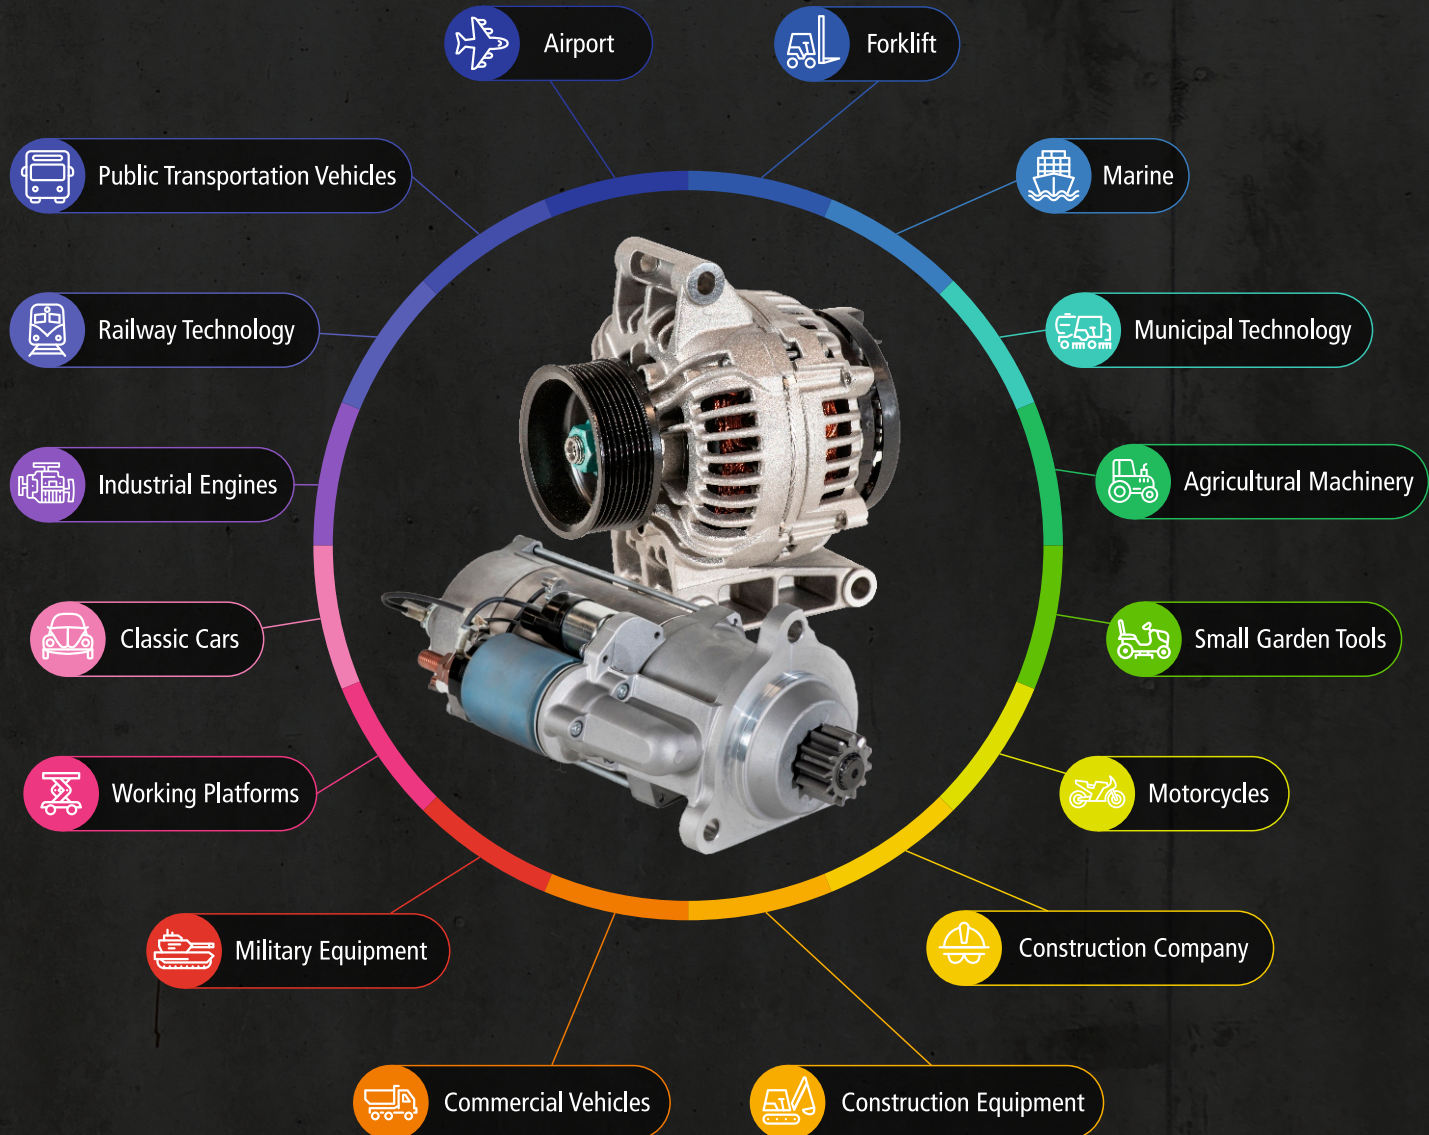

2012 Company team grows to 50 members. Inauguration of the new Quality Assurance Department with four test benches from the world market leader D&V from Canada.

2018 Sadly, co-founder Gerhard Ziegler passes. Ulrich Blass takes on full ownership of the company.

2020 The Blass & Ziegler team is 55 members strong. Further investment in the expansion of the Quality Assurance Department as well as in the final inspection with seven test benches of the latest generation.

OUR PRODUCT RANGE

Our product range includes starters and alternators for commercial vehicles, agricultural and construction machinery, forklifts, industrial engines, marine and military technology, mining equipment, small garden tools, motorcycles and classic cars. Our customers include equipment manufacturers, as well as numerous European airports and municipal workshops.
